DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I Claims 6-8, drawn to a combination – a presentation system-
classified in class 345 , sub-class 443; and

Group II Claims 1-5 drawn to sub-combination – a light pen- classified
in class 362, sub-class 118.

Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination – a presentation system - as claimed does not require the particulars of the subcombination of a light pen as claimed because each may be patentable without the details of the other. Further more the subcombination – a light pen – as claimed has separate utility such as an illuminating marker, and is applicable for any type illumination or light emitting devices.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
